SOFTWARE ENGINEER

Full-Stack Web Developer proficient in Ruby on Rails, JavaScript, and React, backed by coding projects and boot camp education. Proficient in writing adaptable, well-organized code. I enjoy collaborating on projects and am eager to contribute diverse skills to exciting opportunities.

TECHNICAL PROJECTS

Marketing Website for Design Company - [Github](#) | [Website Link](#)

- Worked with client to create a visually appealing website for their business
- Implemented Styled Components to create a mobile responsive, user friendly website

Dog Walking Application - Github: [Frontend](#) + [Backend](#) | [Demo](#)

- Created custom routes using a Rails backend to persist data such as new user sign-ups
- Utilized the React design library "Bootstrap" to add a unique style

Pet Sitting Application - Github: [Frontend](#) + [Backend](#) | [Demo](#)

- Full-Stack application utilizing React for frontend and Rails for the backend
- Included client-side routing in React to create multi-page experience

PREVIOUS WORK EXPERIENCE
